The ICC team has been very good at understanding business requirements and translating these into design for the ePhyto global hub for plant protection trade. They are efficient in delivering and are helpful in communicating technical concepts to IPPC stakeholders.

ePhyto Project Manager, FAO-International Plant Protection Convention (IPPC)

Business Value
ICC offers end-to-end enterprise solutions with technical creativity, data-driven solutions, high levels of customer service, strategic partnerships, United Nations experience and expertise, low Total Cost of Ownership, diverse sourcing solutions, risk mitigation and security expertise.

App Dev Services
With over 17 Clients today, ICC offers business analysis, design, enterprise applications, web sites, end-to-end software development and SDLC life cycle services. Services include DevOps practices and tools, including re-design, SEO, web services, plug-Ins, interfaces, API management, workflow automation, mobile apps and more.
ICC provides very stable services. We appreciate the team in Rome and around the globe for its effort and availability. Thanks for the continuous support and for the move from customer to partnership. WFP

UNHCR, UNICEF and WFP have joined forces to develop the UN Partner Portal, a platform for civil society organizations to engage with the UN on partnership opportunities for the benefit of those we serve. The Portal is designed to facilitate a harmonized, efficient and easy collaboration between the UN and partners.

Working Together and Partnering for Success
Partnerships bring success in achieving development goals, contributing to results, including essential services, capacity strengthening, policy advocacy and development innovations

Application Development at Work
ICC is working with UNICEF, UNHCR and WFP to migrate the legacy portal system to its resilient infrastructure with the benefits of a United Nations shared service with full availability, security and support. ICC will continue to optimise the platform for improved outreach and advocacy.

For more information see the video https://youtu.be/jQYlGxwSbZO or visit the UN Partner Portal at: https://www.unpartnerportal.org.
The ICC team has been efficient with business requirements and design for the ePhyto global hub for plant protection trade - and are helpful in communicating technical concepts to IPPC stakeholders.

ePhyto Project Manager, FAO-International Plant Protection Convention (IPPC)

**Global ePhyto Certificate Hub - Accessed by +25 Countries**

The IPPC hub is a central exchange system to facilitate exchange of ePhyto certificates for plant trade between National Plant Protection Organizations (NPPOs) in countries with a set of prescribed rules of connection and defined certificate structures, codes and terminology.

**Generic ePhyto National System - Ghana, Samoa and Sri Lanka**

The Generic ePhyto National System (GeNS) is a centralized, multi-tenant system to facilitate the creation and transmission of ePhyto certificates for plant trade. For more information see the [GeNS fact sheet](#).

IPPC and ICC have been working together on specifications, design, architecture, build and implementation, including harmonized and standardized approach to format, structure, and codes (where applicable) in the certificate exchange process.
ICC is a valued ICT provider and will continue to be a great partner. ICC has tremendous value such as quick responses and quick setup for services when demand is unpredictable.

UN Department of Operational Support

*We are happy with the value for money represented by ICC.*

OHCHR

The World Health Organization, with a launch from the WHO Director General, showcased its new medication safety mobile app, designed and implemented by ICC during 4th Global Ministerial Summit in Jeddah, 2-3 March 2019. This is a first-ever WHO mobile app for consumers ([see news](#)).

The mobile app represents cutting-edge digital technology in healthcare safety and quality. This patient education tool, called 5 Moments of Medication Safety, works as a ready reckoner for patients to remember things to ask to care provider and precautions to take around medication.

ICC has completed mobile apps for the International Court of Justice in an effort to promote the organization’s image and contribute to a number of communications advantages for users of smart devices. ICC has also released a mobile app for its own service catalogue.
