Who We Are

The United Nations International Computing Centre (UNICC) is the largest strategic partner for common, trusted, and cybersecure digital foundations across the entire UN system. Through state-of-the-art ICT infrastructure, digital tools, cybersecurity, cloud, data and artificial intelligence solutions, UNICC promotes progress toward a more connected, secure, and sustainable UN.

With over 50 years of experience, UNICC supports the digital transformation and future of the UN family and other international organizations, delivering scalable and innovative solutions through a cost-effective and shared services model. This approach empowers our partners and clients to accelerate the adoption of required technologies to better serve global needs.

What Makes Us Unique

UN-specialized

Deeply rooted in the UN system, UNICC brings decades of experience and tailored expertise in delivering digital solutions that meet the unique needs, mandates, and operational realities of UN organizations.

Partnership-driven

UNICC collaborates closely with leading technology providers, UN agencies, and global stakeholders to co-create innovative solutions that align with shared goals and multiply impact.

Cost-recovery model

Operating without core funding, UNICC follows a full cost-recovery model, ensuring transparency, accountability, and value-driven services.

Efficiency-driven

Through shared services, economies of scale, and the reuse of digital components, UNICC promotes operational efficiency and scalable solutions across the UN system.

UNICC Services

UNICC offers a full range of services and solutions built upon industry best practices, international standards and business processes subject to a Continuous Process Improvement cycle.
